

## Fridges for awnings and holiday cottages

The free-standing absorption refrigerators from Dometic give you all the comforts of home. Take a look inside: everything is tidy and in its place thanks to the well thought-out interior.

Storage compartments, adjustable shelves, freezer compartment and multi-purpose boxes included in all larger-size models – just like your fridge at home. Though the absorption fridges have one significant advantage over domestic models – they can be gas operated. This is a major advantage when you are

right off the beaten track and mains power. Another pleasant feature is their silent running. They won't disturb your sleep even if your bed is right next to the fridge. Designed for use in holiday cottages, log cabins, outward bound centres and under awnings.

## Free-standing absorption refrigerators

Pages 36 – 37

Hassle-free operation on 12 volts, 230 volts and gas. Powerful refrigeration performance up to 30°C below ambient temperature. Compact cabinet for easy transport. Functional interior with adjustable shelves.

## Powered by a dream team trio: AC, DC, gas

**Mobile, convenient, versatile:** the Dometic COMBICOOL RF 60 absorption refrigerator is a cool tip for camping and caravan enthusiasts. Its particular strength is its ability to transform three energy sources [12 volts, 230 volts or gas] into amazing cooling power.

So flexible you can easily take it to wherever you need a refrigerator: to the awning, the patio, or to the summer-house. The COMBICOOL FR 60 has a spacious 60-litres interior – well equipped like your fridge at home.

Absorption refrigeration works noiselessly. Therefore, the RF 60 won't disturb anyone's sleep, even if it's placed close to a bed. Enjoy your sleep and have a great day starting with a fresh breakfast!

### Dometic COMBICOOL RF 60

Absorption refrigerator for 12 volts, 230 volts and gas

4.27

<b>Gross capacity</b>		approx. 60 litres
<b>Energy supply</b>		230 volts AC 12 volts DC Gas
<b>Input rating</b>	230 volts/12 volts	110 watts
	Gas	13.6 g/h
<b>Consumption</b>	230 volts	1.9 kWh/24 h
	12 volts	220 Ah/24 h
	Gas min./max.	325/375 g/24 h
<b>Cooling capacity</b>		up to 30°C below ambient temperature
<b>Insulation</b>		Full foam insulation in CFC-free polyurethane foam
<b>System</b>		Absorption cooling
<b>Material</b>		Cabinet of coated sheet steel, door in high-quality plastic
<b>Colour</b>		Silver
<b>Weight</b>		26 kg
<b>Quality features</b>		Piezo ignition, thermostat regulation in 230-volt and gas mode, two door shelves, adjustable shelves, flame indicator, door locking with vent option
<b>Test mark</b>		Certified to European Gas Appliance Directive 90/396/EEC

Dual-energy refrigerators – high performance, ease of use

No electric sockets in sight? Not a problem, Dometic’s RGE 2000 and RGE 300 free-standing absorption refrigerators can use alternative power sources. In locations without mains supply they can chill with gas.

And they won't make a sound while giving it their all. They can chill to 30°C below ambient temperature. In the freezer compartment the temperature sinks to –12°C. With 97 or 146 litres respectively, both appliances

provide a similar volume to a domestic refrigerator and are just as well equipped with adjustable shelves, door racks and bottle stabilisers in the bottom door rack.
